

GWCT

Big Farmland Bird Count Memory Game

Print (2x) and cut the cards. You should have
27 pairs, 54 cards.

Set Up:

Shuffle them face down and arrange them in a grid.

Game Play:

The youngest player goes first, and players take turns to the left turning over two cards, so they are face up. The cards must be turned over completely so all players can see them.

If the player finds a matching pair, they keep it in a pile, and take another turn. If the cards aren't a match turn them back over and the next person has a go. Keep going until all the cards have been matched and removed from the playing area.

End of the Game:

The person who had the most pairs of matching cards is the winner!
